PERFORMANCE CHECKS

2. Summative evaluation for this course is in the form of PCs conducted at the termination training for each PO. As per NAVCORDS 9-60, PCs are tests to assess the accomplishment of the performance under the conditions and to the standards stated in the PO. While the majority of the assessments are practical, other forms of evaluation are conducted where practical assessment is not feasible or possible.

3. Conduct of any PC will be IAW this QSP and amplified by CFNOS SO 307, and any other applicable CFNOS SO.

4. Supplemental PCs must be in the same format and have the same standard as the original test. PCs may contain more than one part to facilitate different methods of assessment or to modularize particularly extensive performance requirements. Unless otherwise stipulated, failure of one part of a PC only requires retest on that part and does not require the trainee to be retested on the entire PC.

RESPONSIBILITY FOR TESTING

5. Standards cell provides a measure of quality control by confirming that POs are achieved according to the standards delineated in the QSP. They are responsible for the design, administration and scoring of all Performance Checks. Enabling Checks will be the responsibility of the Instructional Staff.

Background discussion on the decision to remove OC trg from NBPB/NBPS.

Due to restrictions on NATO/UN deployment regarding the use of chemical irritants the board has decided that the trg will be removed from QSP.

Decision was made to drop the minimum rank for NBPS course to MS from PO2, to enable units to have a qualified A2 as MS are being used in this position in some units.

Decided by the board that a pre-requisite to attending a NBPB course a mbr be capable of ascending and descending a jumping ladder to the height of a CPF missile deck in full NBP gear.

Decided by the board that following CRR 2T29 (team trg) is considered sufficient to re-qualify a person for NBPB if they have been off the team between 2 and 5 years.

ANNEX J – COURSE HISTORY

This annex is to record course history issues such as explanations of amendments, pertinent findings, trends, resource problems and modifications. Focus should be given to both excellent and questionable issues of the course. Capturing important course history information is a useful managerial tool for amendment considerations by future course developers.

Note: This annex shall NOT be deleted. This annex must be annotated with every update / modification to this QSP. This is in addition to making the appropriate entry in the Record of Amendments table. Detail as to the nature and reason for amendments is to be provided here.

Upon direction from Commandant CFNOS QSP Board was held to review both NBPB and NBPS courses as QSP Boards were last held in 2005 and 2000 respectively. These reviews were also needed to provide a baseline standard for development of potential Expeditionary Opposed Boarding course to be developed at a later date.

Additions to the NBPB course include Conduct After Capture Level B, Naval Combat First Aid and return of live agent OC training. A PIP was designed to cut down on training days to keep the course at a reasonable length

Additions to the NBPS course include CEASS OIC qualification and more in depth Witnessing Training.

In both courses the PO's were re-organized to better reflect the way training is conducted.
