PCs will be administered in the form of (PRACTICAL or WRITTEN) examinations and the trainee must obtain a pass in all POs to successfully complete this course.

ENABLING AND PERFORMANCE CHECKS

2. Enabling Checks (ECs). ECs are formative tests that help the trainee and the instructors recognize progress or gaps in learning, so that confirmation or corrective action (such as additional practice or remedial instruction) can be provided. They also reinforce learning, so that it will be better retained for longer periods. Formative tests are designed to give feedback to both the instructor(s) and trainees. Each EO must have at least one EC. Marks for ECs are not calculated in the trainee's final mark.

3. Performance Checks (PCs). PCs are summative tests used to determine if the trainee has met the standard under the conditions (where possible) of the PO and hence can do the job. Supplemental PCs are administered upon failure of a PC and must be in the same format and have the same standard as the original PC.

RESPONSIBILITY FOR TESTING

4. Assessment of trainees is to be done IAW CFITES Vol. 7 – Evaluation

5. Standards provides quality control by designing, administering and scoring all Performance Checks. Any PC not administered or invigilated by standards staff will be administered by a non-involved instructor designated by the senior instructor. Enabling Checks are the responsibility of the Instructional Staff.

PROGRESS MONITORING

6. Monitoring learning is the responsibility of all instructional and standards staff and instructional supervisors. Monitoring, including unsatisfactory progress, is done IAW CFITES Vol 6 - Conduct of Instruction Programmes and TE SOs or SOPs.

7. Continuous monitoring of candidate progress is required on this course in order to provide the following:

Note: Owing to the fact that the QSPWB for the DELTA FF Training for both QL5 and QL6A were built during the same QSPWB, the ROP for both QSPs are identical.

Discussions / Decisions:

DAY ONE

1. LCdr (N) Macdonald, (Chairperson), started the board at 0800 hrs. Introductions were made by each person and included was the importance of the QSP review and improvements to the trade and training.

2. Capt Surette, (TDO), discussed the Canadian Forces Individual Training and Education System (CFITES) reference material and went on to discuss the Agenda, schedule, administration, roles and responsibilities of board members, procedures and aim of this QSP board as well as the plan and approach for the board.

3. The board began the review of the existing draft Master Task List identifying 'Train' and 'No Train' items, as well at which levels 'Train' items should be taught.

DAY TWO

4. Board continued reviewing the MTL.

5. Capt Surette, (TDO), introduced the Scalaring process, discussing its use and how it relates to the board's deliverables. Board moved into the Analysis phase after understanding the scalar process.

6. The board was broken into teams to begin to scalar out the training for both levels of this Delta Training.

7. Difficult Rescue is to mean evacuating a person from a restricted access space or location not to be confused with casualty clearing.

8. The board decided that SABA is a 'No Train' as it is not equipment held in the RCN current.

9. The board decided that MSA is a 'No Train' now that the fleet is 100% dragger.

10. There was a lengthy conversation where the board conceded that Section base 3 training is equal to Section base IC training.

DAY THREE

11. The board reviewed the SCALAR to date. The board then continued to work in groups to scalar both courses.

DAY FOUR

12. Board continued the scalaring process while continuing to refine the 'Train/No Train' list.

13. The boards came to a consensus for the MTL.

14. ST(A) was provided a brief of the training structure and contents as was scalared at the time, and concurred that the development of the FF trg would meet the operational requirement of the HT occupation and of the fleet.

15. EO development was started.

DAY FIVE

16. EO development continued.

DAY SIX

17. EO development continued.

DAY SEVEN

18. EO development continued.

19. The final version of the 'Train/No Train' list for the MLT was agreed upon by the board.

20. The board agreed that Difficult Rescue is to mean evacuating a person from a restricted access space or location, not to be confused with casualty clearing.

21. The board concluded that one of the FLYCO key roles is as a Flight Coordinator communication hub and IC for Crash on deck and Rescue.

22. Transport of Canada dictates 6 FF's – CPO2 Winters.

    Bosn: As highly trained operators in Deck evolutions as well as senior appointments as DC SB IC.

23.

24. The board came to the conclusion that SAC has no experience with IC'ing Deck evolution. DC or Rescue does have the flight knowledge but that is NOT the key role of FLYCO. The member has to be focused as a IC for a crash on deck or emergency rescue. HT who receives more specialized FF training and best fits the requirement?

25. The board discussed Flight Test Safety on the DLN. Course currently stated as a 'should' for MESO, DECKO, FLYCO and Senior FF. Senior FF indication should now be removed or replaced by HT QL6A. Mention of this requirement to be inserted into QL6 PO2.

26. The board decided that Fit Testing DLN will be delivered at QL5 level.

27. The board decided that RPPA on the DLN should be trained at the QL6 level under RPP.

28. The board concluded that, though this question relevant to the OAG not this QSP board the CF Fire Marshal FF Pre-entry Fitness Evaluation should become a H Tech pre-req.

29. WRT AQMS: RPPA training includes the TP AQMS. Currently this is not used by the RCN however it is such a small percentage of the trained material, the board concluded that it need not be changed.

DAY EIGHT

30. SMEs continued to develop EOs.

DAY NINE

31. Opened week with a review of the EO's by the board.

32. C0270 Combat Special Problem incidents; since this is the direct focus of the Navy FF and as such it is a 'No Train'.

DAY TEN

33. SMEs continued to develop EOs.

DAY ELEVEN

34. Assessment development began.

35. The board agreed that a MITE Qual code needs to be assigned to both residential QL6 and FLYCO OJT.

36. The board had a discussion regarding Fit testing instructors: Because there is no seal base, fit testing used to be formally trained on the kit and members became qualified as a PLQ. As this training is transferring to DLN, will no longer be issue. If there are questions on the instructional requirement it is to be fielded to CFFM.

37. The board decided that EO 001.03 will be taught by DL once lunched by CFFM. Until then, this EO will be taught as is laid out in Chapter 4. Verify instructor requirement above.

DAY TWELVE

38. The board continued with instructional analysis and continued identifying the test details; timings and assessment plan for each.

39. The board began a review of Annex K to ensure all details were aligned with the lesson specifications (EO's).

40. Pending the outcome of the pilot course evaluation the board understands TTT may be increased or decreased.

DAY THIRTEEN (Last Day)

41. Orders OPI's to be contacted:

    a. SEMS: RPP & Spills – OPI to be alerted; due to reorganization, the tasks previously fulfilled by the Senior FF will now be supported by the Senior HT.

    b. SSO's: DC Org – Snr FF to be replaced by HT, rounds, watch keeping, NETP tours

42. The board agreed that there needs to be special instructions for Pilot course to be instructed by FF 00149 and shadowed by forecasted HT 00124 instructors.

43. The board concurred that Extraction Familiarization happens at the squadron level with the relevant platform (Cyclone, Sea King) and is covered in QL3 and CRR's.

44. The board agreed that all DL needs to be embedded due to ship to shore ratio and computer access.

45. **EO 003.02 Conduct Aircraft Post-incident Investigation for Fire Reporting**

46. The board also verified the reference list (Annex A) (to be amended at the end of the board)

47. The board convened for a review of the QSP to date, the Record of Proceedings (including the list of action items agreed upon by the board), the template for creating EC's and PC's, and instructional design and development considerations for followup after the board is dissolved.

48. The board Chair summarized the Boards efforts and achievements for the past week and a half week and congratulated the SMEs for their hard work and dedication.

49. The chair thanked the board members for their participation and adjourned the board at 1500hrs, 2 October 2015.
