ROYAL CANADIAN NAVY
QUALIFICATION STANDARD AND PLAN (QSP)

Chief Boatswain Mate (CBM)
RQ CPO2

Boatswain 00105

MITE ID 121917
NQUAL - AIXS

MARPAC RDIMS # 914179

MITE Course IDs

Chief Boatswain Mate (CBM): 121917

The training authority (TA) designated for this qualification is the Commander Naval Personnel and Training Group (CNPTG). Naval Training Development Centre Atlantic (NTDC(A)) is the designated development centre responsible for the maintenance of training. Amendments are to be requested through NTDC(A) and approved by CNPTG.

FOREWORD

1. This training document is developed under the authority of Commander Naval Personnel and Training Group (C/NPTG) and Commanding Officer Naval Training Development Center Atlantic (CO NTDC (A)) in accordance with (IAW) the following references:

a. A-P9-050 Series, Canadian Forces Manual of Individual Training and Education;

b. A-PD-055-002/PP-004, Canadian Armed Forces Military Employment Structure (MES), Volume 2 – General Specifications, Part 4 – Non-Commissioned Member General Specifications dated 09 Feb 2011;

c. A-PD-055-002/PP-002 Job-Based Specification (JBS) for the Boatswain (Bosn's) dated 9 Mar 2017;

d. NAVORD 4500-0; and

e. NPTORD 4500-22.

2. This QSP consists of specific Performance Objectives (PO's) and assessments in Chapter 2. A trainee will achieve the qualification once the standards listed in the PO's have been met.

3. This QSP is effective upon approval and supersedes previous versions.

4. Suggestions for amendments to this QSP may be initiated by anyone and shall be forwarded in writing to NTDC (A), who will forward to NPTG for approval, as appropriate.

5. The designated Training Establishments (TE) for this training are indicated below:

TE	Module	MITE ID	NQual
Naval Fleet Schools	CBM RQ CP02	XXXXX	AIXS

CHAPTER 1: TRAINING MANAGEMENT DETAILS

AIM

1. The aim of this Qualification Standard and Plan (QSP) is to establish the requirements and training for the Chief Boatswain Mate (CBM) course (AIXS). This QSP is designed to assist NTDC(A) in developing, Naval Fleet Schools in conducting and evaluating, and NPTG in validating the training.

COURSE DURATION

2. Course duration is calculated in accordance with (IAW) NPTORD 4500-22, para 4.5. For this course, a period of instruction is 50 minutes in duration.

Course Duration Calculation	
Allocation of ATT	**Periods**
Sum of all EO's/PO's	36
Enabling Checks (EC's)	17
Performance Checks (PC's)	19
Actual Training Time (ATT) Sub-total	**9 trg days**
Allocation of BAT, TAT, TTT and PT IAW NPTORD 4500-22, Table 5.5	**Periods**
Base Administrative Time (BAT)	1
Training Administrative Time (TAT)	1
Training Travel Time (TTT)	
Physical Fitness (PT)	
Sub-total	**.25 trg days**
Course Duration Calculation (ATT+BAT+TTT+TAT+PT) **400 minutes** *** Partial days must be rounded up**	**9.25 trg days**

REQUIRED COURSE STAFFING

3. Idenfity key personnel required to conduct the training.

Position	Rank	Qualifications Required	Qty	POs / EOs
Course Director	CPO2	RQ-CPO2/QL7 (AIXS)	1	All
FDU/ EOD	MS - PO1	IEDD Operator (AJFA)	1	PO 005
Guest Speaker	PO2 – CPO2	Outreach Client Services Co-ordinator (BOR)	1	PO 001
Navigation simulator operator	Civilian	Navigation Simulator Operator Qualified	1	PO 003
Guest Speaker	Civilian	CFB Dockyard Pilot / Tug Qualified	1	PO 003

Guest Speaker	Mil	CFB Halifax BComd – A/BCPO	1	PO 004
Guest Speaker	Mil	CFB Halifax BComd – CFRIS Co-ord	1	PO 001
Guest Speaker	Mil/Civillian	JPSU	1	PO 001
Guest Speaker	Mil	MOG-5 SUBSAR IC	1	PO 002
Guest Speaker	Mil	SAR Tech	1	PO 002
Guest Speaker	Mil	Fleet Force Protection	1	PO 002
Guest Speaker	Mil	NBP Instructor	1	PO 002

COURSE CAPACITY

4. Planning for the conduct of training is based on the guidelines in NPTORD 4500-40.

   a. Maximum – 12;

   b. Minimum – 6; and

   c. Optimum – 10.

PREREQUISITES

5. Prerequisites. To be selected for this course, the loading authority must ensure that trainees have the following prerequisites:

   a. Candidates shall at minimum hold the rank of PO1;

   b. RQ-PO2 (AALE); and

   c. Commanding Officer's Recommendation.

PRIOR LEARNING ASSESSMENT AND RECOGNITION (PLAR)

6. PLAR's shall be conducted IAW NPTORD 4500-27, DAOD 5031-1 and CFITES Vol. 12.

SPECIAL INSTRUCTIONS

7. Nil.

CHAPTER 2: PERFORMANCE OBJECTIVES & LESSON GUIDANCE

PO 001 Advise Command on WOD Evolutions

1. **Performance**: Advise Command on WOD Evolutions (AT0080)

2. **Conditions**:

   a. Given:

      (1) References;
      (2) Operational taskings;
      (3) DWAN accessible classroom;
      (4) Flipcharts/Whiteboards; and
      (5) CFRIS software.

   b. Denied: Nil

   c. Environment:

      (1) Day or night; and
      (2) Alongside or at sea.

3. **Standard**: The Chief Boatswain's Mate (CBM) shall advise chain of command on Watch on Deck (WOD) evolutions (AT0080) by:

   a. Advising chain of command on training standards and requirements (FT0200) by:
      (1) Managing Watch & Station Bill; and
      (2) Maintaining departmental training standards and requirements.

   b. Advising chain of command on operational training (FT0160) by :
      (1) Planning occupational operation training (CRR ship) (FT0140); and
      (2) Developing Combat Readiness Requirement training plan (ship) (FT0220).

4. **Training Limitations:** Nil

EO 001.01 - Advising chain of command on training standards and requirements

001.01A – Manage Watch & Station Bill / Department

Conditions		Sequence
Classroom; Day or night; and Alongside or at sea.		Beginning of PO 001
Time	**Classification**	**Instructor**
200 minutes	Unclas	JPSU Guest Speaker Mata/Pata Clerk RQ-CPO2 BOS'N

Learning Objectives	Method
1)Learn divisional / member's responsibilities & effects regarding JPSU. 2) Learn divisional / members responsibilities & effects regarding Mata and/or Pata Leave. 3)Learn how to use these systems to promote the wellfair of your members and encourage a timely return to work.	Guest Lecture Group Discussion

Scenario	No Scenario. Guest Speaker will cover the following subjects in the Activity Steps.
Activity Steps	Guest speaker from JPSU will speak about the processes listed below. You may also consult the Support webpage at http://www.forces.gc.ca/en/caf-community-support-services-casualty-support/index.page to get more information. Add this to your favorites for quick reference. Ask the speaker as many questions as possible, and write down their names and phone numbers. These guest speakers are now resources available to you. 1. Administering Deck Department requirements to include: a. JPSU Function and Process Overview • Who is eligible / required to be posted to JPSU • Process of posting someone • Divisional responsibilities • Member's responsibilities • Contact info for clarification / questions b. Return to Work Process • Overview • Who is eligible for RtW

- Who co-ordinates RtW at unit, on base
- Divisional responsibilities
- Member's responsibilities
- How conflicts are resolved
- Contact info for clarification / questions

Guest speaker from BAdm will speak about the process listed below. Mata /Pata is more than just a chit with restrictions and a year or 18 months off.

c. Mata/Pata restrictions and requirements to support

- Overview
- Who is eligible to take Mata/Pata
- Process of requesting Mata/Pata
- Divisional responsibilities
- Member's responsibilities
- Effects on Posting / Promotion
- Contact info for clarification / questions

Use your collaborative problem solving method to discuss the aspects of training, the problems seen by the units, and by the outside resources and members.

d. Manage Team Training to include :

- SWOAD;
- NBP;
- Demolitions: (ET0090)
- .50 cal; and (CT0120)
- RAS Teams. (AT0610)

e. Manage miscellaneous training to include:

- NBP;
- 404's;
- Transport of Dangerous Goods;
- Rigid Hull Inflatable Operator Training (RHIOT);
- Special Operations RIB (SORIB);
- Ship's diver;
- Etc.

Resources	References
1) 1 DWAN accessable Classroom. 2) 1 Whiteboard. 3) 1 Laptop for each student. 4) Flip chart	1) CFPAS 2) DAOD 5001-2, Maternity and Parental Benefits 3) DAOD 5003-5, Pregnancy Administration 4) Financial Administration Manual

	5) Guide to the Divisional System

Notes to Instructor

Lesson Prep:

Guest speaker from JPSU to speak in regards to JPSU function and Return to Work Program.

Guest speaker from BAdm to speak in regards to Mata/Pata.

Blank D2794 is in the Instructor folder and should be made available to the student.

DDP- 06-04. Posting of RegF to-Fr JPSU is in the instructor folder and should be made available to the student.

During Lesson:

See what issues or experiences the learners can come up with and how they can/did overcome them. Encourage lots of discussion.

Ask if there are unknown factors that they must consider to make an informed decision.

Not every issue will have a "CORRECT" answer, but there will always be a "MORE CORRECT" or unfavorable option.

EO 001.01- Advising Chain of Command on Training Standards and Requirements

001.01B– Maintaining Departmental Trainining Standards and Requirements (FT0150)

Conditions		**Sequence**
Classroom; Day or night; and Alongside or at sea.		After
Time	**Classification**	**Instructor**
150 minutes	Unclas	RQ-CPO2 BOS'N BASF Chief

Learning Objectives	**Method**
1)Learn to build / maintain a departmental training schedule. 2)Learn to use CFRIS for traininig/unit booking assistance.	Guest Lecture Guided Discussion EDI

Scenario	The Training Chief has asked for assistance in running a requalification shoot at the local range, as members of the ship's company need to be current. Members of your department also require the reqaulification and will be needed to provide instruction and coaching on the firing line.
Activity Steps	BASF Chief will speak in regards to CFRIS, there is also a handout available to follow directions. Each student shall have CFRIS training software installed on their stand alone laptops for this period. Upon completion of the lecture, read the scenario to the class. Using the information provided, students will recognize which members of their departments require a C-8 requalification shoot and decide who will be their firing line staff. Formulate a plan for the shoot and schedule range time using CFRIS. a. Identify key personnel for range / instruction positions. b. Include weapons, ammo, and transport of equipment. c. Training Chief will organize busses and meals. d. Draft range training plan / schedule / member rotations. e. Local range will provide weapons and ammo. f. Available firing lanes due to construction = 14. g. Ships Company requiring training: 63 (incl. your department) h. Deck Dept. requiring training: 4 (LS Cheetah, AB Dalmation, OS Rottweiler and OS Shihtzu)

	Divide class into groups of 3 or 4 students. Each group will be required to build a training plan on a white board or flip chart and brief it to the class for comparison. The remainder of the class will pose questions on behalf of Command and should be encouraged to share knowledge regarding past experiences with the subject matter. Each group will be given 30 minutes to draft a plan and 10 minutes to present it to the class.

Resources	References
1)Canadian forces Range Information System (CFRIS) 2)Whiteboard 3)Flip Chart 4)DWAN accessible Classroom or laptops	1) CFCD 102 (L) CHP RCN Combat Readiness FWD/Training requirements 2) CFCD 129 RCN Readiness and Sustainment Policy, Ch 1, Pg 13, para 105 Personnel Readiness 3) NAVORD 3009-3 Statement of Operational Capability Deficiency, Page 1, para 2.2 4) Monitor Mass 5) CFRIS site

Notes to Instructor

Lesson Prep:

Each student shall have CFRIS training software installed on their stand alone laptops for this period. Speak with BASF Chief prior to course start to get ID/Logins for each student.

During Lesson:

Make sure that the students stay on track, there may be a student that says “we are always undermanned, we just get waivers”, you will need to redirect that negativity into a productive conversation. Maybe “that person” can be the first case study.

EC 001.01 - Advising Chain of Command on Training Standards and Requirements (FT0200)

Scope	Conditions	Sequence
EO 001.01	Classroom	After EO 001.01
Time	**Classification**	**Instructor**
100	Unclas	RQ-CPO2 BOS'N

Scenario	Your vessel, HMCS Wapadysplash is sailing for 2 weeks to complete engineering trials in preperation for your next major deployment. You've been informed that half of your SWOAD team is due for re-certification and you've also been notified that a member of your department is pregnant. Reviewing the ships movements you see that HMCS Odderguy is your only option for SWOAD training prior to the next major deployment, conducting helo ops during your trials, but at another Op Area far from your vessel. The Buffer has asked you to work the problem and provide a viable solution while he is currently attending briefs.
Assessment Steps	1. Break Class into pairs. 2. Provide them with a copy of the W&SB (located in folder on Sharepoint). 3. Inform them that MS Schnauzer, LS Pug and OS Poodle require the re-cert for SWOAD. The CO wants 2 competent SWOAD teams for the deployment as there will be many exercises with allied helo's, day and night. No waivers are currently being considered. 4. AB Labrador has informed command that she is pregnant and presents a medical chit indicating that she is unfit sea. 5. Students will be given 40 minutes to manage the W&SB covering a 1 in 2 system for the positions of PLO/BM (combined), Helm, Throttles, SLO and Scullery. Throttles and SLO will not be combined due the the nature of the trials. 6. Students will be given 10 minutes to brief the instructor (Buffer) with their W&SB plan and recomendation, including AB Labrador's situation.

Resources	References
1) Watch & Station Bill (sharepoint) 2) Flipchart / whiteboards	1) DAOD 5001-2, Maternity and Parental Benefits 2) DAOD 5003-5, Pregnancy Administration 3) Financial Administration Manual 4) Guide to the Divisional System

	5) CFCD 102 (L) CHP RCN Combat Readiness FWD/Training requirements 6) CFCD 129 RCN Readiness and Sustainment Policy, Ch 1, Pg 13, para 105 Personnel Readiness 7) SHOPS

Notes to Instructor

Using the scenario and provided W&SB, the teams will manange their departments so HMCS Wapadysplash can successfully deploy for engineering trials and get the required SWOAD recertifications signed off. If reqested by the students, the Buffer of the HMCS Odderguy will agree to provide 1 x LS, and 2 x OS to fill the positions lost due to the SWOAD recertification however, there is absolutly no chance of AB Labrador being replaced, regardless of students request.

Limitations	Nil
Impact of Failure	In the case of an unsuccessful attempt of EC 001.01, the group will be provided with extra guidance before their PC.

Item	EC 001.01 ADVISING CHAIN OF COMMAND ON TRAINING STANDARDS AND REQUIREMENTS	SAT	UNSAT	Remarks
Student's brief:				
Covered all bridge poitions WRT 1 in 2 watch rotation.		☐	☐	**CRITICAL**
Covered Enter / Leave Harbour positions, incl. SSD positions ESP and CP.		☐	☐	**CRITICAL**
Covered Rescue Stations.		☐	☐	**CRITICAL**
Covered Force Protection States.		☐	☐	
Managed SWOAD Team Training.		☐	☐	**CRITICAL**
Communicated with gaining vessel for exchange of personnel.		☐	☐	
Communicated with BAdm section and / PCC.		☐	☐	

Score: /7

Trainee must achieve 2/3 SATs on non-critical factors and **ALL** critical factors to pass this EC.

Positive Feedback	Improvement Feedback

EC 001 – Overall Assessment – Circle One			
Met Standard		**Did Not Meet Standard**	
Assessor I have discussed the results of EC 001.01 with the candidate.		**Candidate** I have been debriefed on the result of EC 001.01

EO 001.02 – Advising Chain of Command on Operational Training

001.02A – Plan Occupational Operational Exercise (FT0240)

Conditions		Sequence
Classroom		After EC 001.01
Time	**Classification**	**Instructor**
100 mins	Unclas	RQ-CPO2 BOS'N

Learning Objectives	Method
1)Learn to maintain / sustain departmental combat readiness requirement. 2)Identify validity limitation times as related to readiness level. 3)Identify training / delivery methods for CRR's.	Group Discussion

Scenario	Your vessel (HMCS Wapadysplash) is deployed off the coast of your home port, returning in 1 week and CRR's 8-02, 8-08, 8-20 are close to expiration. This may be your last oportunity to sign off the CRR's prior to Sea Training's embarkation alongside in preparation for a major deployment.
Activity Steps	1. W&SB considerations: Current watch rotation: Stbd Watch has the forenoon and first, Port Watch has afternoon and mids for the returning home leg of the deployment. 2. CRR validity limitation requirements 3. Training delivery methods Timings, watches, sleep schedules, etc. Using the following information and the provided W&SB, have the students locate the appropriate CRR's within the references and build a schedule / plan to provide training in order to meet CRR requirements. This plan can then be presented to the Deck O / Combat Officer for insertion into the ships Flex.

Resources	References
1) Whiteboard 2) Flip Chart 3) DWAN accessible Classroom or laptops	1)CFCD 102(N), Ch. 1, Annex A – Halifax Class Validity Table. 2)CFCD 129, Ch. 1, Sec. 107, Para 1.

Notes to Instructor

EC 001.02 - Advising chain of command on operational training

Scope	**Conditions**	**Sequence**
EO 001.02	Classroom	End of EO 001.02
Time	**Classification**	**Instructor**
100 minutes	Unclas	RQ-CPO2 BOS'N

Scenario	Your vessel, HMCS Wapadysplash has been deployed on OP REASSURANCE and CRR's 8-05 and 8-07 are due. Since the ship has been detached for a two day transit to port, you have the opportunity to conduct training and sign off the CRR's.
Assessment Steps	1. Organize the students into pairs. 2. Using the following information and the updated W&SB, have the students locate the appropriate CRR's within the references an build a schedule / plan to provide training in order to meet the CRR requirements for the unit. Students will be required to: a. Identify the CRR's using the current references. b. Identify validity limitation times related to readiness level. c. Plan appropriately for delivery / training of the CRR's. d. Formulate a plan to cover off the positions of the WOD during the training, using the updated W&SB. (GT0090) 3. Students will provide a brief to the Buffer (Instructor).

PO 002 Advise Command on Launching / Recovering Boats

1. **Performance**: Advise Command on Launching / Recovering Boats (AT0330)

2. **Conditions**:

   a. Given:

      1) Tasking Instructions;
      2) DWAN access;
      3) Whiteboard/flipchart; and
      4) References.

   b. Denied: N/A

   c. Environment:

      1) Day or night; and
      2) Alongside or at sea.

3. **Standard**: The CBM shall advise command on launching / recovering boats (AT0330) including:

   a. Advising command on general boat duties (DT0200) to include:
      1) Personnel Transfers; and
      2) Equipment Transfers.

   b. Advising command on rescue at sea operations (AT0380) including:
      1) Advising command on manoverboard; and
      2) Advising command on planned events to include:
         a) SAR;
         b) SubSmash; and
         c) Boarding.

4. **Training Limitations:** Nil

EO 002.01 – Advise Command on General Boat Duties

002.01A – Personnel and Equipment Transfers (DT0200)

Conditions		Sequence
Classroom; Day or night; and Alongside or at Sea.		Beginning of PO 002
Time	**Classification**	**Instructor**
50 mins	Unclas	RQ-CPO2 BOS'N

Learning Objectives	Method
1) Identify considerations for Personnel transfers 2) Identify considerations for Equipment transfers	Group discussion

Scenario	HMCS Wapadysplash is required to conduct a PAX Transfer with HMS Brexit consisting of 20 visiting personnel. Each member will be travelling with two large duffel bags (40 -50 lb/ea.) for an extended stay. There is a limited time to complete the transfer, and a briefing to the CO is required.
Activity Steps	Instructor will remind students on various factors affecting boat operations for 15 minutes to include: Advising command on launch / recover of boats considering: a. Equipment checks i. Boat checks ii. Billy Pugh setup iii. Other nets/ladders b. Timings i. Close-up/secure ii. Load/unload personnel, are they experienced sailors, or civilians iii. Load/unload cargo, tag lines, Billy Pugh, etc c. Boat capacity i. Which boat / boats to use i. Number of personnel per trip ii. Weight of cargo per trip d. Sea state i. Is the sea state within launch / recover parameters ii. Other options, if there are any available

e. Personnel required
   i. Boat lowerers
   ii. Are operators qualified in specialty positions

f. Safety concerns.
   i. HDLJ's
   ii. Weather Conditions

Instructor will break students up into smaller groups and read / give the scenario to them.

The students will discuss the scenario and come up with their best solution to the problem (15 mins)

Instructor will bring all students back together, and have one person from each group brief plan to the class (5 mins per group), as if they were briefing the CO.

After each brief the instructor should encourage questions of the presenter, and offer advice on any missed information.

Resources	References
1) White Board 2) Flip Chart	1) CFCD 105 (NFR) 2) Regs for preventing collisions at sea (Transport Canada) 3) SSO's (STG) 4) Resolve Standing Orders (Federal Fleet Services)

Notes to Instructor

Lesson Prep: No prepatory work required

During Lesson: Ensure groups remain on topic and timings are followed.

EO 002.02 – Advise command on rescue at sea operations (AT 00380)

002.02A – Immediate and Planned Events

Conditions		Sequence
Classroom; Navigation Trainer Day or night; and Alongside or at sea.		After EO 002.01
Time	**Classification**	**Instructor**
300 minutes	Unclas	RQ-CPO2 BOS'N Guest lecture

Learning Objectives	Method
1) Advising Command on Manoverboard. 2) Advising Command on planned events to include: a) SAR b) SubSmash c) Boarding	Guest lecture Group Discussion

Scenario	Scenario Bank
Activity Steps	Guest speaker from JRCC to speak in regards to SAR. Points to include are: a) Placement of equipment in hangar, b) Contents of SAR pack, c) Manning during SAR, d) Deck Dept responsibilities, e) Certification of equipment and, f) Approaching a stricken vessel. Guest speaker from Mog-5 to speak in regards to Subsmash. Points to include are: a) Placement of equipment in hangar, b) Contents of Subsmash gear, c) Manning during Subsmash, d) Deck Dept responsibilities, e) Certification of equipment and, f) Dealing with casualties. NBP instructor to speak in regards to boarding requirements. Points to include are:

a) Safety,
b) Communications COA's,
c) Timings,
d) Deck Dept manning requirements,
e) Extended boardings,
f) Back up boat,
g) Boat Pack/ Boat loadout and,
h) Over the Horizon Ops.

Upon completion of the guest speakers, the instructor will speak with the class regarding considerations that should be made, in the realm of endless **"what if"** scenarios.

Ask the class for solutions to unusual scenarios they may have already experienced during their careers.

Resources	References
1) White Board 2) Flip Chart	1) 2)

Notes to Instructor

Guest speaker from JRCC to speak in regards to SAR.

Guest speaker from Mog-5 to speak in regards to Subsmash.

NBP instructor to speak in regards boarding requirements. A recent NBP A1, A2 or RQ-CPO2 Bos'n.

EC 002.2- Advise Command on Rescue at Sea Operations (AT0380)

Scope	Conditions	Sequence
EO 002.02-002.02	classroom	After EO 002.02
Time	**Classification**	**Instructor**
100 minutes	Unclas	RQ-CPO2 BOS'N

Scenario	Select from the Scenario Bank in the PO 002 folder on sharepoint.
Assessment Steps	Class will be divided into groups of 4-5 students. Each group will be given a scenario. Each group will have 30 minutes to decide a plan of action. Each group will brief the plan to the instructor. The instructor will be role playing the position of the Commanding Officer. The brief should be no longer than 10 minutes. Following the EC checklist: the brief must include all safety considerations.

Resources	References
1) Scenarios 2) Flipcharts / Whiteboards 3) Computer / DWAN	1) 2)

Notes to Instructor
Nil

Limitations	Nil
Impact of Failure	In the case of an unsuccessful attempt of EC 002.02, the group will be provided with extra guidance before their PC.

Item	EC 002.02 ADVISE COMMAND ON RESCUE AT SEA OPERATIONS	SAT	UNSAT	Remarks

PO 003 Advise Command on Fender and Mooring Line Handling

1. **Performance**: Advise Command on Fender and Mooring Line Handling (AT0425)

2. **Conditions**:

   a. Given:

      1) Tasking Instructions;
      2) Nav Sim,
      3) Whiteboard / flipboards;
      4) DWAN Access; and
      5) References.

   b. Denied: N/A

   c. Environment:

      1) Day or night; and
      2) Alongside or at sea.

3. **Standard**: The Chief Boatswain Mate shall advise command on fender and mooring line handling (AT0425) by:

   a. Advising on Tug Utilization including:
      1) Tug availiablity;
      2) Tug placement; and
      3) Tug safety considerations.

   b. Briefing berthing / Medeterranian Mooring plan including:
      1) Personnel considerations;
      2) Resources required;
      3) Weather considerations;
      4) Power availability; and
      5) Safety considerations.

4. **Training Limitations:** Nil

EO 003.01 – Advise on Tug Utilization
003.01A – Tug Utilization

Conditions		Sequence
Classroom; Nav Sim Day or night; and Alongside or at sea.		Beginning of PO 003
Time	**Classification**	**Instructor**
100 minute lecture 200 minute Nav Sim	UNCLAS	RQ-CPO2 QHM Pilot Nav Sim Staff

Learning Objectives	Method
1) Advising on Tug Utilization by: a) Tug availiablity; b) Tug placement; and c) Tug safety considerations.	Guest Speaker Navigation Simulator Powerpoint

Scenario	Scenario Bank
Activity Steps	The students will receive a PowerPoint lecture given by a QHM Pilot which includes: Tug types Advantages / Disadvantages Hawser Angles Placement /employment Occassions for using Tugs Tug capability / limitations Students will be expected to advise on the placements and uses for potential **"what if"** scenarios. What if the tug that shows up is severly underpowered? What if the tug has a freeboard that is higher than expected? How to manage the tug if they are not buttoned on. Etc. At this level, the student should have collected a mass amount of experience, not all ideal, the best way to learn is by personal experience, and by other peoples combined experiences. Use this opportunity to share as much as possible.

	Then students will be given opportunities to ask questions. Using the information from the PowerPoint and discussions the students participate and direct berthing / slipping evolutions in the Nav Sim. The scenarios should show different approaches / departures and weather considerations. (150 mins)

Resources	References
1) Classroom 2) PowerPoint (visual) 3) Computer 4) White Board 5) Flip Chart 6) Nav Sim	1) 2)

Notes to Instructor

Guest Speaker from QHM should speak in regards to tugs / pilots. One of the Nav Simulator Staff would also be a recommended resource.

If the guest speaker is unavailable, the powepoint is on sharepoint in the PO 003 Folder. This EO will be tested during EC 003.02 and PC 003.

Allow two periods for the Guest Speaker presentation, the remainder of the PO will include 16 x 50 minute periods to allow each student time to complete:

1 x berthing
1 x med mooring
1 x EC
1 x PC

Booking Nav Sim will give automatic access to the classroom located in the Nav Sim.

EO 003.02 – Briefing berthing / Medeterranian Mooring
003.02A – Berthing/Med Mooring

Conditions		**Sequence**
Classroom; Day or night; and Alongside or at sea.		After EO 003.02
Time	**Classification**	**Instructor**
200 minutes	Unclas	Nav Sim Staff

Learning Objectives	**Method**
1) Briefing Berthing / Medeterranian Mooring plan including: a) Personnel considerations; b) Resources required; c) Weather considerations; d) Power availability; and e) Safety considerations.	Fishbowl Guest Lecture

Scenario	Scenario Bank in the Nav Sim
Activity Steps	Simulator staff will give the scenario to the student, the scenario should include: Weather considerations, Jetty layout, Wind/currents, Tug Availability Etc. The Student will then brief Command on the evolution IAW EC Checklist. The student will be given the opportunity to direct the med mooring according to their plan. While the directing of the mooring isn't directly tested, it would be highly recommended for the students to run the scenario.

Resources	**References**
1) Classroom 2) PowerPoint (visual) 3) White Board 4) Flip Chart	1) 2)

Notes to Instructor
The Nav Sim already has med mooring scenarios available, so it is recommended to make contact with the staff in the sims prior to the class arrival so they are aware of the program for the period in the trainer. Each student should be given the opportunity to run the evolution prior to the EC. Instructor can add info based on experience or use time for course preparation / course reports/etc.

PO will include 16 x 50 minute periods to allow each student time to complete:

1 x berthing
1 x med mooring
1 x EC
1 x PC

EC 003.02- Advise Command on Fender and Mooring Line Handling

Scope	Conditions	Sequence
EO 003.01-003.02	Classroom	After 003.03
Time	**Classification**	**Instructor**
200 minutes	Unclas	RQ-CPO2 BOSN

Scenario	Nav Sim Scenario Bank
Assessment Steps	Each student is given a medeteranian mooring position. Each student will have 20 minutes to decide a plan of action. Each student will brief the plan to the instructor. The instructor will be role playing the position of the Commanding Officer. The brief should be no longer than 5 minutes. Following the EC checklist: the brief must include all safety considerations. Most preferred tug utilization.

Resources	References
1) Nav Simulator 2) Civilian Operator Experience	1) CFCD 105

Notes to Instructor

The Nav Sim already has med mooring scenarios available, it is recommended to make contact with staff in the Sims prior to the class arrival so they are aware of the program for the period in the trainer.

This method of completing the EC should invoke conversation and allow the students to keep learning throughout the process. Allow the students time to ask questions after marking has occurred. You will likely get a different plan from each student, they will be interested to see the other students trains of thought.

Limitations	NIL
Impact of Failure	In the case of an unsuccessful attempt of EC 003, the group will be provided with extra guidance before their PC.

Item	EC 003.02- ADVISE COMMAND ON FENDER AND MOORING LINE HANDLING	SAT	UNSAT	Remarks
Brief berthing plan to include:				
Personnel considerations		☐	☐	
Resources required • Equipment • PPE		☐	☐	
Weather consideration		☐	☐	
Power availability		☐	☐	
Safety considerations		☐	☐	**Critical**
Tug availability		☐	☐	
Tug placement		☐	☐	
Tug specific safety		☐	☐	**Critical**
Effectively answered questions from Command.		☐	☐	

Score: /9

Trainee must achieve 5/7 SATs on non-critical factors, and **ALL** critical factors to pass this EC.

PO 004 Advise Command on Naval Ceremonial

1. **Performance**: Advise Command on Naval Ceremonial (FT 0370)

2. **Conditions**:

   a. Given:

      1) DWAN Access;
      2) Whiteboards / flipcharts;
      3) Scenarios;
      4) Guest Lecturers;
      5) Deck Department Organization; and
      6) References.

   b. Denied: N/A

   c. Environment:

      1) Day or night; and
      2) Alongside or at sea.

3. **Standard**: The CBM shall advise on Naval Ceremonial (FT0370) by:

   a. Planning a Naval ceremony including:
      1) Change of Command
      2) Manning the Ships side
      3) Freedom of the City (Namesake City)
      4) VIP Visit

   b. Briefing on a Naval Ceremony Plan by:
      1) Presenting the plan including:
         a) Purpose of parade;
         b) Location;
         c) Timings;
         d) Sequence of events;
         e) Information on VIPs; and
         f) Marks of Respect.
      2) Addressing concerns from Command

4. **Training Limitations:** Nil

EO 004.01 – Plan a Naval Ceremony

004.01 – Naval Plan

Conditions		Sequence
Classroom; Day or night; and Alongside or at sea.		
Time	**Classification**	**Instructor**
100 minutes	UNCLAS	A/BCPO

Learning Objectives	Method
1) Planning a Naval ceremony including: a) Change of Command b) Manning the Ships side c) Freedom of the City (Namesake City) d) VIP Visit	Guest Lecturer Group Discussion

Scenario	Directly following the return from Op Aulovit, the CO will be turning over to Cdr Newb. The CO would like to have the plans made available soonest to ensure that all proper bookings can be made thru the Log O. He would also like to discuss other events that may arise over the next several months.
Activity Steps	The Base Chief Petty Officer's office typically sees, or is referred to, for all of the ceremonial events on the base, and has a wealth of experience. It is recommended that they come in to speak to the class regarding some of the ceremonial events they may have to deal with as a Buffer onboard ship. Additional points for the guest speaker to cover: parade permit, road closures, assistance from local authorities, transport, weapons (if required), transport of weapons, timings, and conducting a recon of the area. The students should be encouraged to participate in the discussion as they have likely been directly involved in some, if not all of the ceremonies done locally or abroad.

Resources	References
1) Outside Agencies; 2) DWAN accessable Classroom; 3) White Board; and 4) Flip Chart	1) A-PD-201-000/PT-00D (The CF Manual of Drill and Ceremonial);

Notes to Instructor

The A/BCPO would be ideal, or some other Senior NCO from that office to speak on ceremonial events. If no one is available from that office, a RQ-CPO2 Bos'n will suffice.

EO 004.02 – Advising on a Naval Ceremony Plan

004.02A – Naval Brief

Conditions		Sequence
Classroom; Day or night; and Alongside or at sea.		After 004.01
Time	**Classification**	**Instructor**
100 minutes	Unclas	A/BCPO

Learning Objectives	Method
1) Briefing the parade plan 2) Adressing concerns from Command	Guest lecturer Group Discussion

Scenario	
Activity Steps	A Guest speaker from the Base Chief Petty Officer's office will speak in regards to forming a plan for a ceremonial parade, not on the ship. Points for the guest lecturer to cover: a) Purpose of parade; b) Location; c) Timings; d) Sequence of events; e) Information on VIPs; and f) Marks of Respect. The students should be encouraged to participate in the discussion as they have likely been directly involved in some, if not all of the ceremonies done locally or abroad.

PO 005 Advise on Management Procedures for IED's

1. **Performance**: Advise on Management Procedures for IED's (ET0050) (ET0040)

2. **Conditions**:

   a. Given:

      1) Deck Department Organization;
      2) FDU Support;
      3) Visual Aids;
      4) Dive Tender; and
      5) References.

   b. Denied: N/A

   c. Environment:

      1) Day or night; and
      2) Alongside or at Sea.

3. **Standard**: The CBM shall advise management procedures for IED's (ET0050) including:

   a. Performing Explosive Ordinance Identification Team (EOIT) Reconnaissance (ET0040) by:
      1) Communicating with sentry; and
      2) Collecting IED Information including:
         (a) construction of an IED;
         (b) IED placement; and
         (c) Hazards in the immediate vicinity.

   b. Briefing command on IED situation including:
      1) Blast route;
      2) Saftey concerns; and
      3) Adjacent comprtments.

4. **Training Limitations**: **ONLY** properly trained EOD personnel (**HC qualified**[1]) will take proactive steps to neutralize/move suspect improvised explosive devices or booby traps. JTF(A)/JTF(P) or the Task Group Commander must be notified at the earliest opportunity to request assistance of the nearest EOD team. The primary method of dealing with an explosive device will be for an EOD Team to be dispatched to neutralize the device.

[1] HC Qualified is a term found in the current SSO's however it is outdated by the EOD Community and should be referred to as CIED or Counter IED Qualified.

EO 005.01 - Performing Explosive Ordinance Identification Team (EOIT) Reconnaissance

005.01A –Collecting IED Information

Conditions		Sequence
FDU Classroom; Day or night; and Alongside or at Sea		Start of PO 005
Time	**Classification**	**Instructor**
50 minutes	Unclas	Clearance Diver

Learning Objectives	Method
1) Construction of an IED 2) IED Placement 3) Hazards in the immediate vicinity	Lecture Field Trip Powerpoint

Scenario	As per FDU Guidance
Activity Steps	This PO will be done at the FDU, given by an EOD specialist at the unit. 1. The instructor will have various visual aids and examples of IEDs that have been found in the past, the students will be given an opportunity to look at the inert objects. In a perfect world, the student would be able to identify the construction of the IED to include the switch, imitiator, charge, power source and the container. However in real life scenarios this is highly unlikely. It is more likely that the student would only see the container. Being able to describe that item to the fullest: size, material, depth, if is it dry, or wet, or leaking, or damaged will be vital to pass on to the trained experts. The emphasis of this teaching point should be that IEDs do not resemble items from old cartoons with three sticks of dynamite and a clock, they will likely look inconspicuous. While searching the space, the use of personnel that are familiar with the space will be vital. 2. The chances of someone getting onto a ship to place an explosive are very low, however if they do make it on to the ship, they will have very little time to place the item. The placement of the IED will likely be in an easy to access area, and made to be inconspicuous. The chances of the suspect having time to lay out trip wires, or whatnot are very limited. 3. The EOD specialist that will be tasked to the ship is likely not familiar with the ship or the possible the class of ship. The information of all of the hazards

	in the zone, needs to be passed on. Having a Know your Ship Book available, with an engineer to describe if fuel lines are around will be vital. If the location is above or below the waterline, the EOD specialist will need to know. The EOD specialist has access to a Vanguard; giving the basic information of hatch combings, and hights of doorjambs will allow the EOD specialist to decide if they can utilize that resource. This teaching point will include a powerpoint and presentation that is usually given to Naval Boarding Party Supervisors on Risk Management.

Resources	References
1) Whiteboard 2) Flip chart	

Notes to Instructor

This PO will be given by a Clearance Diver at FDU, the amount of information available at the unit will ensure that the content is delivered in depth with real life scenarios.

This PO will be 8 x 50 minute periods(one full training day) at FDU, it will include lesson topics and EC/PC gven by the Clearance Diver. The Clearance Diver instructor may adjust the parameters of the scheduling to accommodate all topics within those 8 periods of instruction.

50 minutes	Unclas	Clearance Diver

Learning Objectives	Method
1) The 5 W's	Lecture Field Trip Powerpoint

Scenario	As per FDU Guidance
Activity Steps	The bomb search program is a long one, when an IED is found the sentry is likely the first or only person that has seen it. Getting as much information from them is vital. Why? Because if there is an IED, you want to have as little contact with it as possible. It is a suspected explosive. All contact with it should be as limited as possible. A checklist such as what is printed in the PC of this PO can be used so that the EOIT can get as much information as possible before they put themselves in danger by going to view the item. ***Witness Questioning (the 5 W's)*** **What** is it? • What does the suspect IED look like? • What shape, size is it? • What is the container made of (metal, plastic etc.)? • Are there any timers, lights, switches, markings, wire or any other features? • How big is it? • Allows the assessment of the area to be evacuated and the potential damage should a blast occur **Where** is it? • Where is the suspect IED located? • Is there access to the compartment? • Is there a safe route? How was that safe route established? • Where exactly did they go? What did they do?

	• Did they notice anything unusual on the route? • Determine if there are any secondary hazards in the area • May greatly increase the danger area **When** was it placed/found there? • When was the suspect IED laid or found? **Why** was it placed there? • The answers to this may indicate the source of the IED which could lead to its likely make-up, complexity and means of initiation • Is there an important piece of equipment nearby (ie. radio room) or important person (ie. visiting VIP) **Whether** anything was seen or heard? • Witness accounts of terrorist words or actions may give an indication as to how the IED is intended to function • Attempt to establish if the terrorist left more than one IED • What did he do? Where did he go? For how long? Did he say anything? Did he touch anything?

Notes to Instructor

EC 005.01 - Performing Explosive Ordinance Identification Team (EOIT) Reconnaissance

Scope	Conditions	Sequence
	FDU Classroom; Dive Tender; Day or night; and Alongside or at Sea	After 005.01
Time	**Classification**	**Instructor**
50minutes	Unclas	Clearance Diver RQ CPO2 Bos'n

Scenario	The ship is in the process of completing a bomb search IAW SSO's. Word has come back to command that a suspect IED has been located. Forward EOIT has been dispatched to the location.
Assessment Steps	Students will go to the location as detailed in the scenario. This may be a classroom, or a vessel, or another area that they can physically go to. Ideal scenario would be one of the tenders at FDU. The students will speak to the sentry to get as much detail as possible. They must ensure that the suspect IED is not disturbed in any way.

Resources	References
1) 2)	1) 2)

Notes to Instructor

If the student disturbs the suspect IED in any way, it is an immediate failure.

Section 1 of the EC – construction of the IED, it is highly unlikely that all componants will be visible, when the students takes this into consideration they will get the SATs.

There are other sections that the student may not have an answer for, however the question must be taken into consideration to get the SAT

Limitations	NIL
Impact of Failure	In the case of an unsuccessful attempt of EC 005.01, the group will be provided with extra guidance before their PC.

Item	EC 005.01 Performance Statement	SAT	UNSAT	Remarks

EO 005.02 - Briefing command on IED Situation

005.02 – Safety Considerations

Conditions		Sequence
FDU Classroom; Dive Tender; Day or night; and Alongside or at Sea		After EC 005.01
Time	**Classification**	**Instructor**
100 minutes	Unclas	Clearance Diver

Learning Objectives	Method
1) Blast Routes 2) Adjacent Compartments	Group Discussion Fishbowl

Scenario	
Activity Steps	1. Blast route discussions will be held with the EOIT, engineers and other personnel on the ship. These blast route decisions should be made far from the blast zone, and in a timely manner. The deciding factors for the appropriate blast route should be considered in relation to the risk management process outlined in the previous EO. 2. Adjacent compartment considerations, to include risks, fuel pipers, HP air, Vital equipment, sleeping compartments, engineering etc. This should be the "what else would/could be lost if this IED detonates? Is it vital? Is that the purpose of this placement?"

Resources	References
1) Guest speaker 2) Whiteboard 3) Flip chart	1) 2)

Notes to Instructor
EO 005.02 will be tested in PC 005

This PO will be given by a Clearance Diver at FDU, the amount of information available at the unit will ensure that the content is delivered in depth with current real life scenarios.

This PO will be 8 x 50 minute periods (one full training day) at FDU, it will include lesson topics and EC/PC gven by the Clearance Diver. The Clearance Diver instructor may adjust the parameters of the scheduling to accommodate all topics within those 8 periods of instruction.

PC 005- Advise on Management Procedures for IED's

Scope	Conditions	Sequence
PO 005	FDU Classoom Dive Tender	End of PO 005
Time	**Classification**	**Instructor**
150	Unclas	Clearance Diver

Scenario	Op Aulovit has just left port in Sumcity. The Canadian Embassy has received intel stating that a terrorist has placed an explosive on the ship. The ship has commenced a Bomb Search.
Assessment Steps	The students will be tested individually. If possible, using two vessels to test concurrently. The student will arrive on site, the Clearance Diver will advise the student of the scenario and of the information available. The student will have an opportunity to ask as many questions as possible to the Clearance Diver prior to following thru their checklist. The student will then go to the bridge to brief command. The RQ CPO2 instructor (or another clearance diver) will act as position of command.

1)Dive Tender 2)FDU 3) Visual Aids	1) SSO's AL10.1 Section 7.3 para 13/14

Notes to Instructor
Section 1 of the PC – construction of the IED, it is highly unlikely that all componants will be visible, when the students takes this into consideration they will get the SATs. There are other sections that the student may not have an answer for, however the question must be taken into consideration to get the SAT

Limitations	**Only** properly trained EOD personnel (**HC qualified**[2]) will take proactive steps to neutralize/move suspect improvised explosive devices or booby traps. JTF(A)/JTF(P) or the Task Group Commander must be notified at the earliest opportunity to request assistance of the nearest EOD team. *The primary method of dealing with an explosive device will be for an EOD Team to be dispatched to neutralize the device.*

[2] HC Qualified is a term found in the current SSO's however it is outdated by the EOD Community and should be referred to as CIED or Counter IED Qualified.

Impact of Failure	IAW NPTORD 4500-54

Item	PC 005 Advise on Management Procedures for IED's	SAT	UNSAT	Remarks
1. Advise on the construction of an IED

PO 006 Advise Command on Cable Operations (AT0190)

1. **Performance**: Advise Command on Cable Operations

2. **Conditions**:

   a. Given:

      1) References;
      2) Publications;
      3) Whiteboard/flipcharts; and
      4) DWAN computer.

   b. Denied: Nil

   c. Environment:

      1) Day or night; and
      2) Alongside or at Sea.

3. **Standard**: The CBM shall advise command on cable operations including:

   a. Advising command on dropping and weighing anchor (AT0190) by:
      1) Developing a plan including:
         a) Personnel considerations;
         b) Equipment required;
         c) Weather considerations;
         d) Power availability;
         e) Safety considerations; and
         f) Sequence of events.
      2) Briefing the plan to command; and
      3) Answering questions from Command.

   b. Advising command on securing to and slipping from a buoy (AT0230) by:
      1) Developing a plan including:
         a) Personell considerations;
         b) Equipment required;
         c) Weather considerations;
         d) Power availability;
         e) Safety considerations; and
         f) Sequence of events.
      2) Briefing the plan to command; and
      3) Answering questions from Command.

4. **Training Limitations**: Nil.

EO 006.01 – Advise Command on Dropping/Weighing anchor

006.01A – Dropping and weighting anchor plan

Conditions		**Sequence**
Classroom		Beginning of PO 006
Time	**Classification**	**Instructor**
50 minutes	Unclas	RQ CPO2

Learning Objectives	**Method**
1) Advising command on dropping and weighing anchor (AT0190) by: a) Developing a plan including: b) Briefing the plan to command; and c) Answering questions from Command.	Group Discussion

Scenario	Scenario Bank
Activity Steps	1. Dropping and weighing anchor is a common task, when it all goes well, there is no deviation from the manual. It is cut and dry, blank and white. All previous coursing teaches us the sequence events, how to do, how to supervise, how to think ahead. The purpose of this EO is to cover the "what if" situation. What if there is an equipment failure? In reality dropping of the anchor can only have equipment or weather issues. However, weighing anchor can open an plethora of issues. Equipment failures, power failures, bringing up objects from the bottom, bringing up cables from the bottoms, twists in the cable, anchor is coming up out of track etc etc. Separate the group into smaller work groups, give each of them a flip chart and some markers, assign them an issue. (you may draw from the EC Scenario bank) have them come up with a plan to include: Personnel considerations; Equipment required; Weather considerations; Power availability; Safety considerations; and Sequence of events. This plan may have to include jettison of the anchor, calling in FDU etc.

	2. Briefing the plan to Command, at this point in your career, briefing should come with a level of naturality, if you cover all of the generic responses, consider as many of the “what ifs” as possible and leave very little room for another “what if” to arise the plan should brief well. As much consideration and pre-thought as possible should encourage confidence. 3.Every well laid plan can fall off the rails at any point. Responding to concerns from command will allow the CO to get the comfortable feeling and trust in their CBM to get the unique situation delt with efficiently.

Notes to Instructor

EC 006.01 Advise Command on Dropping/Weighing anchor

Scope	Conditions	Sequence
EO 006.01		After EO 006.01
Time	**Classification**	**Instructor**
100 minutes	UNCLAS	RQ CPO2

Scenario	Dropping/weighing Scenario bank
Activity	Students will be broken into equal groups (4-5 ppl) Each Group is given a scenario from the scenario bank. Each group will have 10 minutes to decide a plan of action. The plan must include items from the EC checklist below. Each group will assign one speaker to brief the plan to the instructor. The instructor will be role playing the position of the CO. The brief should be no longer than 5 minutes.

Resources	References
1) Paper 2) Writing Utensil	1) CFCD 105

Notes to Instructor	Prior to the EC- The scenario bank is located in the PO 006 folder on sharepoint. Choose one scenario for each group. This method of completing the EC should invoke conversation and allow the students to keep learning throughout the process. Allow the students time to ask questions after marking has occurred. You may likely get a different plan from each student, it will be interesting to see other students train of thought.

Limitations	NIL
Impact of Failure	In the case of an unsuccessful attempt of EC 006, the group will be provided with extra guidance before their PC.

Item	EC 006.01 ADVISE COMMAND ON DROPPING/WEIGHING ANCHOR	SAT	UNSAT	Remarks
Brief anchorage plan to include:				
Personnel considerations		☐	☐	
Resources required		☐	☐	
Weather consideration		☐	☐	
Power availability		☐	☐	
Sequence of events IAW current doctrine		☐	☐	
Safety considerations		☐	☐	**Critical**
Effectively answered questions from Command.		☐	☐	

Score: /

Trainee must achieve 4/6 SATs on non-critical factors and **ALL** critical factors to pass this EC.

Time	**Classification**	**Instructor**
50 minutes	Unclas	RQ CPO2

Learning Objectives	**Method**
1. Advising command on securing to and slipping from a buoy (AT0230) by a) Developing a plan b) Briefing the plan to command c) Answering questions from Command	Group Discussion

Scenario	Scenario Bank
Activity Steps	1. Coming to a buoy has more working parts than that of its associated task of anchorage. The addition of working parts means that there is more that can go wrong. Think of as many "what if" scenarios as possible. The weather has deteriorated, the buoy is coming out of the water, the windlass is not responding to controls, the boat has died while standing off, buoy jumpers fall in the water, angry sea lions won't get off the buoy etc. Separate the class into smaller work groups, give each of them a flip chart and some markers. Assign them an issue. (you may draw from the EC Scenario bank) have them come up with a plan to include: Personnel considerations; Equipment required; Weather considerations; Power availability; Safety considerations; and Sequence of events. 2. Briefing the plan to Command, at this point in your career, briefing should come with a level of naturality, if you cover all of the generic responses, consider as many of the "what ifs" as possible and leave very little room for another "what if" to arise the plan should brief well. As much consideration and pre-thought as possible should encourage confidence.

	3.Every well laid plan can fall off the rails at any point. Responding to concerns from command will allow the CO to get the comfortable feeling and trust in their CBM to get the unique situation delt with efficiently.

PC 006– Advise Command on Cable Operations

Scope	Conditions	Sequence
Time	**Classification**	**Instructor**
150 minutes	UNCLAS	RQ CPO2 Bosn

Scenario	
Activity	Students will be randomly assigned a partner. Students will wait outside the classroom or another space. Students will be asked to enter the room with the instructor, again assuming the position of CO. Students will randomly select a scenario card, they will have 10 minutes to come up with a plan and brief the CO. The brief should be no longer than 5 minutes. It should include the items on the PC checklist below.

Resources	References
N/A	CFCD 105

Notes to Instructor	Prior to the PC- The scenario bank is located in the PO 006 folder on sharepoint. Print off the scenarios, and cut each flash card out. Lay them face down on a table/desk prior to the students arriving for the PC. Testing the PC in pairs allows both students to discuss the situation together, it is rare that the CBM on a ship will come up with a plan and implement it without first speaking with the only other qualified person on the ship. This method of testing should encourage that conversation and sharing of knowledge.

Limitations	NIL
Impact of Failure	IAW NPTORD 4500-54

FT0140	Plan occupational operational training (CRR ship)	001
FT0150	Conduct occupational operational training (CRR's)	001
FT0160	Advise chain of command on operational training	001
FT0200	Advise chain of command on training standards and requirements	001
FT0220	Develop Combat Readiness Requirement training plan (ship)	001
FT0370	Advise on Naval Ceremonial	004

Dates: Nov 20th-Dec 10th/ 2018

Location: Naval Training Development Center Atlantic

Working Group Members:

Surname	Initials	Rank	MOSID	Unit
Murray	G.S	CPO2	00105	NTDC(A)
Newell	A.R	PO1	00105	NTDC(A)
MacGillivary	J.P	PO2	00105	NTDC(A)
Breland	M.I	Capt	00211	NTDC(A)

Working Group Objective:

1. The objective of this working group is to:

   a. Update the CBM QSP to reflect the objectives of the Future Naval Training System Strategy, and the direction of CO NTDC(A) to include:

      i. Expansion of performance based instruction and assessments;
      ii. Incorporation of adult learning methodologies;
      iii. Maximum inclusion of Scenario Based Training; and
      iv. Maxiumum divestment of PowerPoint and lecture based instruction.

   b. Adhere to a new QSP format ("Lesson Guidance") with the following objectives:

      i. Shortening the length (pages) of the QSP;
      ii. Shortening the duration of QSP working groups; and
      iii. Maximizing QSP interoperability with MCS School Manager;

Specification Task – No Train Decisions:

Task #	Task Statement	Substantiation
AT0280	Advise command on towing	Taught on RQ – PO2 / Experience.
AT0450	Lead unique seamanship evolutions IAW plan	Experience.
AT0460	Supervise unique seamanship evolutions	Publications / Experience.
AT0470	Enforce policy and procedures of seamanship evolutions	Publications / Experience.
AT0610	Advise command on RAS	Taught on RQ – PO2.
AT0620	Assess quality of on deck RAS procedures	Taught on RQ – PO2 / Publications / Experience.
AT0840	Advise command on ceremonial procedures	Publications / Templates / Experience.
BT0140	Advise command on paint ship operations	Publications / Mundane / Experience.

BT0290	Advise command on status of departmental maintenance activities	Publications / Experience.
BT0300	Advise command on deck evolution policy and doctrine	Publications / Experience.
BT0310	Manage deck equipment certification (on ship)	DRMIS, taught on RQ – PO2 / Experience.
BT0330	Advise command on ships husbandry	Experience based assessment.
BT0340	Monitor the certification of deck equipment	Experience based assessment.
BT0350	Liase with shore facilities for the certification and maintenance of deck equipment	DRMIS, taught on RQ – PO2 / Experience.
BT0360	Ensure the quality of shipboard equipment and equipment maintenance routines	Experience based assessment.
CT0120	Advise command on serviceability/status of small arms	Experience based assessment.
CT0220	Enforce security policy and procedures for small arms storage	Regulations / Experience.
DT0200	Advise command on cargo/personnel transfer operations	Experience based assessment.
ET0090	Advise on demolition operations	Publications / Experience.
FT0070	Conduct course evaluations	Experience based assessment.
FT0100	Approve completion of OJT training	Experience based assessment.
FT0110	Test/Certify Boat Coxn qualification	Experience based assessment.
FT0150	Conduct occupational operational training (CRR's)	Experience in consultation with Deck Officer.
FT0260	Evaluate SWOAD team performance	Not CBM Specific. Unique Specialty Qualification (USQ) – RCAF assessment.
FT0280	Evaluate RAS team performance	Taught on RQ – PO2 / Experience.
FT0290	Evaluate rescue team performance	Experience based assessment.
FT0320	Enforce safety of demolition ranges	Taught on RQ – PO2 / Experience.
FT0330	Evaluate demolition team performance	Experience based assessment.
FT0340	Advise on Naval demolition training	Experience based assessment.
GT0010	Advise on personnel issues	Experience based assessment.
GT0030	Advise personnel on career management issues, policies, regulations and procedures	Experience based assessment.
GT0040	Advise on general occupational development issues	Experience based assessment.

GT0050	Advise chain of command on emerging capabilities and requirements	Experience based assessment.
GT0060	Generate career management messages (e.g. posting, promotion)	Experience based assessment.
GT0060	Advise chain of command on status of occupational specifications	Experience based assessment.
GT0080	Contribute to occupational selection boards	Experience based assessment.

Discussions / Decisions:

1. The board reviewed the old QSP

2. The task list from JBS and made Train/No train decisions which are documented in the table above.

Guidance to Development and/or Instructional Staff:

3. The Alternate Instructional Techniques Learner Manual (change 2) was used as a resource for the development of the lesson guidance provided. Development and instructional staff should refer to the AIT Learner Manual for best practices of the delivery of lessons using alternate instructional techniques.

4. The Scheduling Annex is a draft annex that was developed in consultation with the Campus Atlantic Scheduling Section during the conduct of this working group. Lessons learned /issues with course scheduling completed using this annex should be brought to the attention of LSC staff.

Follow Up Action:

Item	Action	OPI	Expected Date of Completion
1	Compile lesson resources	NTDC(A) – CCD Analysts	

QSP Approval for purposes of Pilot:

1. Commandant NTDC, Cdr Fry approved QSP and requested Pilot 14 Dec 2018

2. Approval to pilot was granteed by SO Quantity Control, Cdr Elbourne on 17 December 2018.

3. QSP Delivered to Bosn Training Manager for review and confirmation of compliance against Master Task List. Analysis performed utilizing JTAR to compare POs against NEW MTL contained in the ongoing Occupational Analysis. Analysis found QSP to be in compliance with over 90% of JTAR results . Discrepancies forwarded to NTDC for inclusion in Post Pilot results.

4. QSP Version identified as Version 1. Changes which result as a consequence of Pilot will be result in version 2.

5. MITE Code 121917 assigned.

6. Pilot QSP approved by A/ SO Quality Control, Lcdr Ball on 4 Feb 2019

7. Upon completion of post pilot review and change the final document will resieve approval Signature from CNPTG.
